

n e w s l e t t e r

Dear Readers,

We are happy to share with you the call for participation in the [STEP H2020 Project Dialogue & Contest](#) on Climate Change!

Today's youth generation are the first to feel the impacts of climate change but also the ones that can team up and force a change!

In that frame STEP invites young people to participate and express themselves in the Climate Change dialogue! Prizes await those who will STEP up and share their opinion.

Participants are asked to reply to a questionnaire and provide information about their perception of climate change and how do they suggest that it can be tackled.

To that extent we would like to invite you to participate and promote the contest to your contacts, friends and networks.

The results of this "public - dialogue" will be formatted to a report and communicated to a number of International organisations active in the thematic area of Climate Change.

We would like to thank you in advance for your participation and assistance to the matter.

Best Regards

The Step Project team

Unique prizes await those who will STEP up and share their opinion!
